Saskatchewan Association of Social Workers

Private Practice Registry of Registered Social Workers in Saskatchewan

January 2014
This Registry is a listing of registered social workers in private practice in Saskatchewan. Application to be listed in the Registry is voluntary.

The Saskatchewan Association of Social Workers is the professional association for social workers. As a member of the Canadian Association of Social Workers, there are national requirements for social work practice which include adherence to the Code of Ethics and Standards for Ethical Social Work Practice.

For over 40 years, SASW has been an integral part of the social and health services network in Saskatchewan. By advocating for regulation of social work practice, the Association's goals are to protect the public, to ensure competence, and to be accountable.

The Saskatchewan Registry of Social Workers in Private Practice is one mechanism to assist in ensuring ethical and competent professional social work services.

SASW is responsible for receiving complaints about unprofessional social work practice. All written concerns are investigated by the Professional Conduct Committee.

**Definition of Terms**

Private practitioners are social workers who, wholly or in part, are engaged in the independent practice of social work without the benefit of supervision provided by an employer or board of directors. They are solely responsible for their actions in whatever field they practice (i.e. clinical practice, social work administration, social work research, social work education, and contract work).

(Reprinted from SASW Standards for the Private Practice of Social Work, 2008)

**Criteria**

**Criteria for Registration of Private Practitioners**

SASW maintains a Registry of Private Practitioners as part of the Association's mandate under the Social Workers Act. Membership on the Registry is voluntary. Applications for membership are reviewed by the Registrar and the Chair of the Standards of Practice Committee. The names of approved applicants are placed on the Registry by the Registrar.

In all cases, social work experience refers to a position in which the primary professional designation is social work OR for which a social work credential was required or optional.

The following is required in making an application:

(a) To substantiate an applicant's social work credential, a transcript issued directly to SASW from the academic institution which awarded /conferred the degree, unless this has already been provided to SASW.

(b) Current registration in good standing as a social worker (RSW) in the Province of Saskatchewan, and who has been a registered social worker for at least three consecutive years in Saskatchewan or elsewhere, immediately prior to making application.

(c) A criminal records check current to within six (6) months of the date of application, and a report of any pending criminal charges. In addition, applicants will indicate whether they have ever been found guilty or convicted of a criminal offence in any jurisdiction.

(d) A plan that identifies arrangements for supervision of the applicant's practice or for consultation regarding practice with a description of how the plan will be implemented.

(e) Proof of current professional liability insurance.

**Additional Criteria for Registration with Master of Social Work Degree (MSW):**

(a) Four (4) or more years of paid supervised post-MSW social work experience. Applicants must demonstrate that their experience relates to their proposed field of private practice.
(b) Three written references by registered social workers who can provide direct knowledge of the most recent four years of the applicant’s professional practice, and who are currently not employed by and are not in partnership with the applicant.

**Additional Criteria for Registration with Bachelor of Social Work Degree or Bachelor of Indian Social Work Degree (BSW/BISW)**

(a) Eight (8) or more years of paid supervised post BSW/BISW social work experience of which 75% of the time must have been supervised social work experience. Applicants must demonstrate that their experience relates to their proposed field of private practice and that their social work experience has been “outstanding” and “exceptional”. This experience will be evaluated in the areas of demonstrated competence, knowledge and skills in the field of practice.

(b) Three written references by registered social workers who can provide direct knowledge of the most recent four years of the applicant’s professional practice, and who are currently not employed by and are not in partnership with the applicant. These references will be asked to comment on the applicant’s level of competence and to evaluate the applicant’s knowledge, skill and competence in their field of professional practice.

**Additional Training**

Private practitioners, who include in their practice, areas where they received training other than from a school of social work, must provide documentation substantiating their education in the area and/or their supervised experience in the area. This would include, but is not limited to training such as hypnotherapy, sexual therapy, somatic training and Reiki. The quality of the additional training that is reported is not examined by SASW. Further, SASW does not warrant or make any representation as to a practitioner’s expertise in an area where this type of identified additional training has been reported.

**Grandparenting**

The application criteria for this Registry were amended by the SASW Council in October, 2008. Those already included earlier in 2008 are able to continue with their private practice registration even if they do not meet the revised criteria so long as they do not have a break in their Registry registration. If a break in the registry registration occurs, the private practitioner would be required to meet the criteria in place at that future time.

**Ongoing Obligations For Those Admitted To The SASW Private Practice Registry**

(a) A social worker engaged in private practice who is on the Registry must identify herself/himself as a professional social worker to her/his clients, associates, referral agents, and the public by way of RSW designation. In addition, social workers in private practice must be prepared to identify to their clients and the public their academic and professional qualifications.

(b) Applicants / members of the Registry shall maintain malpractice liability insurance. Proof of insurance must be submitted annually.

(c) Members of the Registry shall commit to the use of ongoing professional supervision from a member of the Association and be prepared to submit proof of consultation if requested by the Registrar.

(d) Members of the Registry shall submit an “annual update” at the time of paying RSW fees.
ARBUTHNOTT, Dennis
