Lakeshore Convention Centre
TORONTO

JANUARY 25-26, 2019
The RA Centre
OTTAWA

MiCBT is an evidence-based transdiagnostic therapy approach to clinical disorders that integrates mindfulness training with core principles of Cognitive Behavioural Therapy. MiCBT offers a novel and effective therapeutic system for addressing a wide range of psychological disorders.

This two-day workshop describes the theoretical framework underlying MiCBT and will introduce you to the clinical use of mindfulness skills across a wide range of chronic and acute conditions.

LEARNING OBJECTIVES

- Principles and skills in mindfulness practice
- Theoretical fundamentals of mindfulness training
- The use of mindfulness meditation to neutralise operant conditioning and improve therapeutic efficacy
- Engaging the client in the treatment plan
- The four stages of MiCBT

Earn CE CPA credits

Dr. Andrea Grabovac, MD, FRCP(C), is a Clinical Associate Professor of Psychiatry at the University of British Columbia and an inpatient psychiatrist at the Vancouver Hospital.

Since 2006, she has been using mindfulness-based interventions in various clinical populations and providing training and mentorship for clinicians in MBCT and MiCBT.

Dr. Alia Offman, C. Psych is a registered psychologist in Ottawa, providing counselling and professional training services using MiCBT.

She is an instructor at Carleton University, a trainer at the MiCBT Institute and teaches mindfulness skills to grad school students as a volunteer with the Mindful School Program.

"MiCBT brilliantly integrates the heart of Western psychology, CBT, with the 2500-year tradition of Eastern mindfulness. This theoretical integration is, in my opinion, among the best thinking in the field today."

Dr. Peter MacLean, Psychologist, Ottawa

WORKSHOP OUTLINE

DAY 1

- Overview of the 4 stages of MiCBT
- The co-emergence model of reinforcement
